

LOEWIN JON VILLANUEVA

BS Information Technology Student | OJT Applicant — Web Development, Backend & Software Engineering
Nueva Ecija, Philippines · loewinvillanueva07@gmail.com · linkedin.com/in/loewin-villanueva-a9a019312 · github.com/Orphic20

SUMMARY

BS Information Technology student at Central Luzon State University and Presidential Lister, building full-stack products with Vite, React, FastAPI, and PostgreSQL. Seeking an OJT placement in web development, backend, or software engineering. Google certificates in IT support, Python automation, and AI.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, C, SQL

Frameworks & UI: Vite, React, wouter, FastAPI, Tailwind CSS, shadcn/ui

Databases & cloud: PostgreSQL, MySQL, Supabase, Cloudinary, Firebase

Tools & DevOps: Git, GitHub, Linux CLI, Vercel, Cloudflare, Render, Swagger UI, CI/CD

Core concepts: Agile / Scrum, networking fundamentals, OS administration, IT security basics, troubleshooting & debugging, automation

TECHNICAL EXPERIENCE

CourtFlow — Legal Case Management Platform

Jan – Oct 2026

Full-stack developer, three-person capstone team · Vite, React, wouter, FastAPI, PostgreSQL, Firebase

- Built a case-management system for a civil and family law practice in Nueva Ecija (200 clients, 150 active cases) previously run on spreadsheets, a whiteboard, and a group chat.
- Designed the PostgreSQL 16 schema and FastAPI services: GIN-indexed full-text search across cases, clients, and documents; a daily cron job that flags hearings within three days.
- Version-controlled case files on Firebase Storage (version, status, approver in Postgres). Shipped via GitHub CI/CD to Vercel and Render in one-to-two week Scrum sprints.

Muñoz Bike Rental

Aug – Sep 2026

Full-stack · React, Vite, FastAPI, Supabase

- Catalogue, date-based availability, and multi-bike checkout for a 100+ bike shop (GCash receipt or cash at pickup).
- Modeled one booking (payment) with many rentals (one per bike). Bikes stay available until staff release; then the rental is active and the bike is rented.
- Checkout uses each bike's daily or weekly rate. GCash receipts go to Cloudinary for staff review (not a payment webhook). Google OAuth and JWT-protected API.

PROJECTS

Resume & Candidate RAG Engine

In development

Python, FastAPI, PostgreSQL (pgvector), Redis, SQLAlchemy 2.0, Pydantic v2, OpenAI API

- Building hybrid search that combines Postgres SQL filters with pgvector similarity, using layout-aware resume parsing (PyMuPDF4LLM) and a Redis + ARQ worker that returns 202 Accepted on upload.
- Planned: streamed search results and batch PDF uploads without blocking the API.

Personal Portfolio · Next.js, React, Tailwind CSS, Vercel

2026

- Designed and deployed a static personal site with typed project case studies and Vercel CI/CD.

CERTIFICATIONS

Google IT Automation with Python — Professional Certificate

Mar 2026

Coursera · Python, Git, troubleshooting, configuration management, IT automation

Google IT Support — Professional Certificate

Jan 2025

Coursera · Technical support, networking, operating systems, IT security

Google AI Essentials

Nov 2024

Coursera · Foundations of AI tools and responsible AI practices

EDUCATION

BS Information Technology, Central Luzon State University

2023 – Present

Nueva Ecija, Philippines · Presidential Lister · Class President, AY 2024–2027 · Student Coach & Team Captain, Varsity Swimming · Batch Leader, BITS

LEADERSHIP & ADDITIONAL EXPERIENCE

Project Manager / Digital Asset Manager, Limitless Guild (Nov 2021 – Jul 2022) — Recruited and managed 20+ scholars; built operational tracking systems.

Personal Fitness Trainer / Swimming & Kickboxing Instructor (Sep 2024 – Dec 2025) — Coached 10+ clients; managed scheduling and curriculum.
