

LOEWIN JON VILLANUEVA

BS Information Technology Student | OJT Applicant — Web Development & Software Engineering
Nueva Ecija, Philippines | loewinvillanueva07@gmail.com | [linkedin.com/in/loewin-villanueva-a9a019312](https://www.linkedin.com/in/loewin-villanueva-a9a019312) | github.com/Orphic20

SUMMARY

BS Information Technology student at Central Luzon State University and Presidential Lister, with hands-on experience designing and shipping full-stack, cloud-integrated platforms. Skilled across Next.js, React, Python, FastAPI, and PostgreSQL, with three Google Professional Certificates and a track record of leading teams on campus and in freelance work.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, C, SQL
Frameworks & UI: Next.js, React, FastAPI, Tailwind CSS, shadcn/ui
Databases & Cloud Storage: PostgreSQL, MySQL, Supabase, Cloudinary, Firebase
Tools & DevOps: Git, GitHub, Linux CLI, Vercel, Cloudflare, Render, Postman, Swagger UI, CI/CD
Core Concepts: Agile/Scrum, Networking Fundamentals, OS Administration, IT Security Basics, troubleshooting & debugging, automation
Soft Skills: Leadership, team management, communication, time management, organizational skills

TECHNICAL EXPERIENCE

Capstone Project | CourtFlow Web-Based Legal Case Management Platform

Frontend: Next.js, React, TailwindCSS — Backend: Python, FastAPI, PostgreSQL — DevOps: Git, CI/CD, Vercel, Render

- Built a full-stack legal case management platform with Next.js, React, Python, and FastAPI, automating intake, scheduling, and document workflows for a law office serving 200+ clients.
- Architected a centralized PostgreSQL database with role-based access control and GIN indexes, enabling instant full-text search across active cases and legal documents.
- Implemented a secure, version-controlled document system on Firebase Storage to safeguard client petitions and judicial affidavits.
- Automated court-hearing reminders with scheduled cron jobs, eliminating missed deadlines across the case docket.
- Shipped continuously in an Agile Scrum team, using GitHub CI/CD to deploy the Vercel frontend and Render backend.

Full-Stack Developer | VeloRide (Bike Rental Platform)

Frontend: Next.js, React, TailwindCSS — Backend: Python, FastAPI, Supabase (PostgreSQL) — Media: Cloudinary

- Developed an end-to-end platform using Next.js and FastAPI to automate reservations, maintenance, and payments for a 100+ bike fleet.
- Designed a relational PostgreSQL database via Supabase with transactional logic to prevent double-bookings, real-time inventory, dynamic pricing, and Google OAuth.
- Optimized performance via Cloudinary WebP compression and a zero-cost, anti-cold-start deployment across Cloudflare and Render.
- Built webhook interceptors to capture and compress GCash payment receipts via Cloudinary, and secured routes using Supabase Auth (JWT).

PROJECTS

RAG Search Engine with Elasticsearch | Python, FastAPI, PostgreSQL (pgvector), LangChain, OpenAI in development

- Engineered a low-latency RAG pipeline using FastAPI and PostgreSQL (pgvector) for semantic search.
- Automated the parsing, chunking, and embedding of unstructured documents using LangChain and OpenAI.
- Optimized retrieval strategies and prompt engineering to reduce LLM hallucinations and deliver context-grounded answers.

Personal Portfolio & Technical Showcase | Next.js, React, Tailwind CSS, Vercel

- Designed and deployed a responsive personal site showcasing architecture diagrams, live demos, and skills, using Vercel CI/CD.

CERTIFICATIONS

Google IT Automation with Python — Professional Certificate Mar 2026
Coursera | 7-course program covering Python, Git & GitHub, troubleshooting & debugging, configuration management, IT automation
Google IT Support — Professional Certificate Jan 2025
Coursera | 5-course program covering technical support, networking, operating systems, system administration, IT security
Google AI Essentials Nov 2024
Coursera | Foundations of AI tools and responsible AI practices

EDUCATION

Bachelor of Science in Information Technology 2023 – Present
Central Luzon State University, Nueva Ecija, Philippines | Grade: Presidential Lister

- Class President, Academic Year 2024–2027, Student Coach & Team Captain, Varsity Swimming Team
- Batch Leader, Builders of Information Technology Society (BITS)

LEADERSHIP & ADDITIONAL EXPERIENCE

Project Manager / Digital Asset Manager, P2E Guild Nov 2021 – Jul 2022
Limitless Guild | Nueva Ecija, Philippines (Hybrid)

- Recruited and managed a team of 20+ scholars, overseeing performance tracking, payroll, and resource allocation.
- Built and maintained operational tracking systems using spreadsheets and communication platforms.

Personal Fitness Trainer / Swimming & Kickboxing Instructor Sep 2024 – Dec 2025
Self-employed | Nueva Ecija, Philippines

- Coached and mentored 10+ clients through personalized training programs.
- Managed client scheduling, appointments, and curriculum planning.
